1 I. Description of the Dispute in Arbitration.

2 Respondent City of Anaheim (“City”) and Claimant Santiago Geologic Hazard Abatement  
3 District (the “District” or “SGHAD”) are parties to an agreement made in 1999 (Ex. 17) (the  
4 “Agreement”) which provides in paragraph 6 at page 4:

5 Effective upon the satisfaction of all conditions to this agreement, the District  
6 hereby assumes sole and total responsibility for all ownership, control,  
7 operational, maintenance, and repair responsibilities relating to the Dewatering  
8 Facilities. The District shall operate, maintain, and repair all or part of the  
9 Dewatering Facilities, as well as any additional new or replacement facilities the  
10 District may construct or install, in a manner within its discretion which will  
11 control groundwater levels to prevent reactivation and/or to abate movement of  
12 the Santiago Landslide.

13 The District is a separate political subdivision of the State of California (Pub. Resources  
14 Code § 26570) and is governed by a five-person Board of Directors. It is not a political  
15 subdivision of or an agency of the City. It was formed pursuant to Public Resources Code section  
16 26500, *et seq.* (Stipulated Facts #13.) The District’s members are the owners of the  
17 approximately 303 Assessor parcels of properties within the District boundaries. (Stipulated Facts  
18 #24.)

19 As of January 1, 2023 the District has \$381,210.06 in cash or cash alternatives (Stipulated  
20 Facts #19), and its operating budget for 2022-2023 is \$339,566, which includes the legal costs  
21 associated with these arbitration proceedings (Stipulated Facts #18). During the two years when  
22 legal costs associated with the arbitration were not incurred (2019-2020 and 2020-2021), the  
23 operating budgets of the District averaged a little over \$268,000 per year. (Stipulated Facts #18.)  
24 While the District has the power to raise additional funds by means of assessments on the  
25 properties making up the District, an assessment will be defeated if a majority of the assessed  
26 value that actually votes, votes against the assessment. (Stipulated Facts #24.) The District  
27 proposed assessments in 2019 and 2022, but the property owners that make up the District voted  
28 down both proposed assessments. (Stipulated Facts #25 and #28,)

SGHAD’s demand for arbitration seeks a declaration that its performance of any  
contractual obligation to maintain, operate, or repair the Dewatering Facilities will be excused  
when the funds on hand have been depleted based on the doctrines of impossibility, impracticality,

1 and/or frustration of purpose. Alternatively, SGHAD seeks a declaratory judgment that the  
2 Agreement does not impose on SGHAD any obligation to operate, maintain, or repair the  
3 Dewatering Facilities upon the depletion of its funds. (Stipulated Facts #30.)

4 The City disagrees (i) that SGHAD is entitled to a declaratory judgment, and/or (ii) that the  
5 doctrines of impossibility, impracticality, and/or frustration of purpose apply. In addition, the City  
6 contends that there is no actual controversy as required by California Code of Civil Procedure  
7 section 1060 that would warrant a declaratory judgment. (Stipulated Facts #31.)

8 II. Background Facts to the Dispute in Arbitration.

9 The District's initial funding of \$3.5 million was by way of a settlement in 1999 of 15  
10 consolidated lawsuits (the "Delmonico Lawsuit") filed against the City and other parties in  
11 connection with a landslide (the "Santiago Landslide") and the cross-complaints filed in those  
12 lawsuits. (Stipulated Facts #5 & #10.)<sup>1</sup> Gross movement of the Santiago Landslide (that  
13 accelerated in January 1993) was stopped by the City's installation of a complex system of  
14 Dewatering Facilities that lowered the ground water levels in the area. (Stipulated Facts #1.) The  
15 City retained geological and geotechnical consultants, Eberhart & Stone, Inc. ("E&S") to assist the  
16 City with the emergency response and to investigate the geologic conditions and report its findings  
17 and conclusions. (Stipulated Facts #2.) E&S prepared and submitted its June 28, 1996 report to  
18 the City ("E&S Report") that documented the conditions and incidents associated with the  
19 Santiago Landslide. The E&S Report recommended "[t]he implementation of a Geological  
20 Hazard Abatement District ("GHAD") [as] a means of raising the necessary funds for maintaining,

21 \_\_\_\_\_  
22 <sup>1</sup> The "Santiago Landslide" refers to an area encompassing roughly 25 acres of developed  
23 and natural terrain in the Anaheim Hills area of Anaheim, California consisting of portions of  
24 Tracts 7587, 9080, 9133, 9134 and 10996. Ground deformations associated with the Santiago  
25 Landslide accelerated in January 1993 during massive rainstorms that hit Orange County. The  
26 rainstorms wreaked damage throughout Orange County causing the California Governor to  
27 proclaim a state of emergency in Orange County and ultimately cause President Clinton to declare  
28 Orange County a disaster area. The City also declared a state of emergency and defined the area  
of the Santiago Landslide a "Disaster Area." Pursuant to this declaration, the City took emergency  
actions including the installation (within publicly owned and privately owned properties) and  
operation of a system of vertical and horizontal wells to lower ground water levels for the area, as  
well as installation of observation wells, piezometers, manometers and other devices to measure  
ground water levels and ground movement as well as facilities to power the equipment and to  
discharge the withdrawn ground water ("Dewatering Facilities"). The intent and result of the  
operation of the Dewatering Facilities was to lower groundwater levels and thereby stop further  
earth movement. By February 15, 1993 gross earth movement ceased. (Stipulated Facts #1.)

1 monitoring, and managing the dewatering system for the benefit of all properties threatened by  
2 renewed landslide movement.” The E&S Report further concluded: “Expenditures for operation,  
3 maintenance, and monitoring of the system will continue as long as the potential for high ground  
4 water remains. Therefore, the existing dewatering operation and its associated costs are likely to  
5 remain necessary indefinitely. (Stipulated Facts #4.)

6 In 1993, approximately 464 individuals, representing ownership of approximately 249  
7 separate parcels of real property in Anaheim Hills, some within what was later found to be the  
8 Santiago Landslide boundaries and some outside of those boundaries, filed 15 separate lawsuits  
9 against the City and several other defendants. (Stipulated Facts #5.) The City filed cross-  
10 complaints against a group of the plaintiff property owners and others. (Stipulated Facts #6.)

11 In 1998, after a series of preliminary rulings in the Delmonico Lawsuit and the deposition  
12 testimony of a neutral court appointed geologist, settlement negotiations ensued between the City  
13 and the Delmonico Lawsuit plaintiffs (and other parties to the lawsuit). Part of the settlement  
14 discussions involved the proposal for the City to initiate the formation of a GHAD. The formation  
15 of the GHAD required a vote of the owners of the properties within the boundaries of the proposed  
16 district, whereby a majority protest (based upon assessed value) would preclude the formation of  
17 the district. One issue in the settlement negotiations between the City and the plaintiffs was how  
18 much of the settlement dollars would be dedicated to fund the district, if it were formed.  
19 (Stipulated Facts #8.)

20 The City proposed that \$8 million of the settlement funds in the proposed settlement with  
21 the Plaintiffs be directed towards funding the proposed GHAD and its proposed responsibilities in  
22 connection with the Dewatering Facilities. After consultation with their clients, Plaintiffs’  
23 attorneys rejected that proposal and responded that Plaintiffs would only agree to setting aside a  
24 maximum of \$3.5 million of the settlement funds towards funding the proposed GHAD. (Decl. of  
25 Michael Rubin, ¶ 6.)

26 The meeting notes of the plaintiffs’ Landslide Committee dated March 5, 1998 (which the  
27 SGHAD included in its agenda package for its September 8, 2022 public meeting (see Ex. 3, ANA  
28 533-535, and see Ex. 38, SGHAD 4773- 4775) reflect the proposal for the \$8 million GHAD

1 allocation that the City made back in 1998. As set forth in those meeting notes, “The City would  
2 like the GHAD to be funded at 8 million dollars.” The meeting notes go on to state: “our  
3 attorneys prefer that more of the settlement money go into our pockets than be in a hazard  
4 abatement district, where a future surplus might then be used by the City for other purposes. Our  
5 attorneys have run the numbers and say that \$3.5 million would pay for pumping, repairs,  
6 replacement and maintenance for many decades.” (Decl. of Michael Rubin, ¶ 7.)

7 A settlement agreement (“Delmonico Agreement”) was reached between the City and the  
8 plaintiffs dated March 2, 1999. The total settlement sum to settle the Delmonico Lawsuit  
9 (including consolidated cases) under the Settlement agreement with the City was \$15,500,000.  
10 (Stipulated Facts #9.)

11 The Delmonico Agreement provided that \$3.5 million of the \$15.5 million settlement sum  
12 was to “be paid to the GHAD, if approved, providing the GHAD enters into the contract with the  
13 City referred to herein relating to the Dewatering System by April 30, 1999. If the GHAD is not  
14 approved or if the GHAD does not enter into the contract with the City by April 30, 1999, the  
15 Agreement shall have no further force or effect and neither the Settlement Distribution nor the  
16 GHAD Distribution shall be made, unless the City agrees to waive the GHAD conditions.”  
17 (Stipulated Facts #10.)

18 On February 23, 1999, in anticipation of the proposed settlement, Anaheim’s City Council  
19 passed Resolution No. 99R-31 which initiated proceedings to form a geologic hazard abatement  
20 district pursuant to Public Resources Code section 26500, *et seq.* The Resolution set a public  
21 hearing on March 16, 1999 to consider the formation of the district and to receive written  
22 objection from owners of real property proposed to be included with the GHAD boundaries. A  
23 majority protest, i.e., written objections from property owners representing greater than 50 percent  
24 of the assessed valuation, would preclude the formation of the district. (Stipulated Facts #11.)

25 The overwhelming majority of the properties within the boundaries of the SGHAD were  
26 properties that had been owned by Plaintiffs in the Delmonico Lawsuit. A map showing the  
27 properties within the boundaries of the SGHAD that had been owned by Plaintiffs in the  
28 Delmonico Lawsuit was included by the SGHAD in its agenda package for its September 8, 2022

1 public meeting (see Ex. 38, SGHAD 4772). (Decl. of Michael Rubin, ¶ 10.)

2 On March 16, 1999, the City Council, after finding that it had not received written  
3 objections from property owners representing greater than 50 percent of the assessed valuation,  
4 passed Resolution No. 99R-50 approving the formation of the SGHAD. (Stipulated Facts #12.)

5 The members of the Board of the SGHAD were sworn in and held their first meeting on  
6 March 29, 1999. (Stipulated Facts #14.) Michael Rubin attended that meeting on behalf of the  
7 City as did attorneys for the SGHAD, and an attorney for the Delmonico plaintiffs. At that  
8 meeting, Mr. Rubin was asked by one of the Board members what the cost was to operate the  
9 Dewatering Facilities. Mr. Rubin responded that the cost being paid by the City had been  
10 approximately \$230,000 per year. The Board member responded that the \$3.5 million would not  
11 be enough to cover those costs indefinitely. Mr. Rubin concurred and indicated that the City had  
12 proposed a larger amount of the settlement go to the SGHAD but that had been rejected. The gist  
13 of this discussion is reflected in the minutes of the March 29, 1999 SGHAD Board meeting (Ex.  
14 12, pp. SGHAD 4085-4089, at the bottom of p. SGHAD 4088). (Decl. of Michael Rubin, ¶ 11;  
15 see also Stipulated Facts #14 at lines 17-23.)

16 The SGHAD Board met again on April 12, 1999. At that meeting various costs for  
17 management of the SGHAD were discussed including \$1,000 per month proposal by a consultant  
18 to provide management services, \$7,400 per month for well monitoring, and \$9,000 per month for  
19 geologic engineering services by Eberhart & Stone for monitoring. The SGHAD Board met on  
20 April 28, 1999 and among other things discussed the proposed agreement with the City. The  
21 SGHAD Board met on May 10, 1999 and among other things received a presentation by geologic  
22 engineer, Mark McLarty of Eberhart & Stone and also received a bid for liability insurance for  
23 \$63,000 per year. In addition to the SGHAD Board members, representatives of the law firm of  
24 Burke Williams & Sorenson attended all of these meetings as General Counsel for the SGHAD.  
25 (Stipulated Facts #14 at lines 23 through end of paragraph.)

26 At the May 10, 1999 SGHAD Board meeting, Chairman Collett made a motion to not  
27 approve the contract with the City based upon his belief that the SGHAD would be underfunded.  
28 This motion was seconded by Director Muratori who stated that he agreed with Chairman Collett.

1 The motion to not approve the contract failed 3-0. After further discussion a motion was made to  
2 approve the contract which passed by a 2-1 vote. (Stipulated Facts #15, also see Ex. 13, Minutes  
3 of May 10, 1999 SGHAD Board Meeting, at p. SGHAD 4084.)

4 III. The Key Terms of the Agreement.

5 On or about June 10, 1999, Anaheim and SGHAD entered into the Agreement. (Stipulated  
6 Facts #16.)

7 Recital G of the Agreement (Ex. 17, at p. SGHAD 483) provides:

8 The proposed settlement of lawsuits filed in connection with the Santiago  
9 Landslide provides that the city will initiate proceedings for the formation of  
10 Geologic Hazard Abatement District which would be responsible of funding,  
11 operating, monitoring, maintaining and repairing the Dewatering Facilities and to  
12 take such other actions as are necessary to prevent reactivation and abate  
13 movement of the Santiago Landslide.

12 Recital H of the Agreement (Ex. 17, at p. SGHAD 483) provides:

13 It is anticipated that \$3,500,000 of the settlement proceeds called for under the  
14 proposed Settlement Agreement will be transferred to the District to fund its  
15 operations, provided that certain conditions are met. (The \$3,500,000 is referred  
16 to herein as the "GHAD Distribution".) One of these conditions is the execution  
17 of this Agreement by the City and the District to provide for, among other things,  
18 the ownership, operation, maintenance, and repair of the Dewatering Facilities by  
19 the District in order to prevent reactivation and to abate movement of the Santiago  
20 Landslide.

18 Section 6(a) of the Agreement (Ex. 17, at p. SGHAD 485) provides:

19 Effective upon the satisfaction of all conditions to this agreement. the District  
20 hereby assumes sole and total responsibility for all ownership. control,  
21 operational, maintenance, and repair responsibilities relating to the Dewatering  
22 Facilities. **The District shall operate, maintain, and repair all or part of the  
23 Dewatering Facilities, as well as any additional new or replacement facilities  
24 the District may construct or install, in a manner within its discretion which  
25 will control groundwater levels to prevent reactivation and/or to abate  
26 movement of the Santiago Landslide.** [bolding added.]

24 Section 5 of the Agreement (Ex. 17, at p. SGHAD 485) provides:

25 The GHAD Distribution, and any interest or earnings thereon, may only be  
26 expended for construction, acquisition, operation, maintenance, and repair of  
27 dewatering wells and other devices for the purpose of monitoring, abating and/or  
28 stabilizing past, present and future land movement of the Santiago Landslide  
and/or lowering groundwater levels in the vicinity of the Santiago Landslide  
reasonably deemed to materially or substantially promote the objective of  
stabilizing or abating past, present and future land movement of the Santiago  
Landslide or to party administrative expenses reasonably related thereto. The

1 GHAD Distribution, and any interest or earnings thereon, cannot be used to fund  
2 activities or facilities which do not materially or substantially promote this  
3 objective. The District is free, in its discretion, to perform any activities and  
4 functions it is empowered to perform by Public Resources § 26500 et seq. with  
5 funds from other sources. However, the GHAD Distribution, and any interest or  
6 earnings thereon, may only be expended for the purposes set forth in this section.

7 SGHAD has operated, maintained, and repaired the Dewatering Facilities since  
8 approximately late 1999 or early 2000. (Stipulated Facts # 17.)

9 IV. Section 1060 of the California Code of Civil Procedure Requires a Case of Actual  
10 Controversy and Does Not Embrace Controversies that Are Conjectural, Anticipated to  
11 Occur in the Future, or an Attempt to Obtain an Advisory Opinion From the Court.

12 California Code of Civil Procedure section 1060 provides in relevant part:

13 Any person interested ... under a contract ... may, in cases of actual controversy,  
14 relating to the legal rights and duties of the respective parties, bring an original  
15 action or cross-complaint in the superior court for a declaration of his or her rights  
16 and duties ...

17 The California Supreme Court applied and interpreted section 1060 in *Meyer v. Sprint*  
18 *Spectrum L.P.* (2009) 45 Cal.4th 634. In that case, plaintiffs, who had contracts with Sprint for  
19 cellular telephone service, sued Sprint for alleged violations of the unfair competition laws and for  
20 declaratory relief, based upon the alleged illegality and unconscionability of contractual provisions  
21 that (i) required binding arbitration of disputes, (ii) waived the right to a jury trial in resolving  
22 disputes, (iii) waived class action in arbitration, (iv) failed to provide for discovery before  
23 arbitration, (v) split the cost of arbitration, (vi) disclaimed warranties and limited liability,  
24 (vii) permitted Sprint to unilaterally change the terms of the customer service agreement,  
25 (viii) imposed a 60-day limitation period for initiating billing disputes, and (ix) imposed a \$150  
26 early termination fee. Sprint had not sought to enforce any unconscionable term against the  
27 plaintiffs and had not actually imposed additional transaction costs on the plaintiffs. The Court  
28 first upheld the denial of relief under the various unfair competition laws because the plaintiffs had  
not been injured, and then upheld the sustaining of a demurrer to the declaratory relief cause of  
action.

1 The Court’s opinion stated at p. 648:

2 declaratory relief is designed in large part as a practical means of resolving  
3 controversies, so that parties can conform their conduct to the law and prevent  
4 future litigation. There may indeed be cases in which the settlement of questions  
5 of the validity of contractual remedies has practical consequences, such as when a  
6 party’s decision to enter into a contract reasonably turns on the answer to these  
7 questions (see *Suttles, supra*, 220 Cal.App.3d 1148, 269 Cal.Rptr. 709), or when a  
8 party alleges with sufficient particularity that the continuation of a contractual  
9 relationship plausibly hinges on such answers. But when resolution of the  
10 controversy over future remedies would have little practical effect in terms of  
11 altering parties’ behavior, courts have considerable discretion, pursuant to Code  
12 of Civil Procedure section 1061, to deny declaratory relief because it “is not  
13 necessary or proper at the time under all the circumstances” ...

14 In the present case, plaintiffs have not with any particularity alleged that the  
15 resolution of the declaratory relief action concerning contractual remedies would,  
16 at this point, have any practical consequences. No dispute has arisen that would  
17 cause these remedial provisions to come into play, and plaintiffs do not allege that  
18 the continuation of the contractual relationship depends on the resolution of these  
19 questions. We therefore conclude the trial court did not abuse its discretion in  
20 sustaining a demurrer to plaintiffs’ declaratory relief action.

21 (*Id.* at p. 648.)

22 In the current arbitration, there is no case of actual controversy that meets the tests set forth  
23 by the California Supreme Court in the *Meyer* case. There is no allegation that the City has  
24 threatened to sue SGHAD if SGHAD fails to continue the operation of the Dewatering Facilities  
25 after SGHAD’s funds run out. If the hypothetical circumstance of running out of funds arises,  
26 SGHAD is essentially predicting the action of a future city council by positing the controversy. In  
27 fact, it would seem to be an idle act to sue the SGHAD to perform under such circumstances,  
28 because the SGHAD would not have the capability of performing.

SGHAD is unable to show how declaratory relief in this matter will assist the parties to  
conform their conduct to the law and prevent future litigation. Claimant here has initiated  
litigation/arbitration in a matter where no future litigation/arbitration is likely to be avoided.  
There may be no better example of when to deny declaratory relief, because granting declaratory  
relief will encourage arbitration/litigation (and both parties’ expenditure of fees and time) when  
none otherwise would be likely. This runs clearly afoul of the purposes of declaratory relief as  
explicated by the California Supreme Court in *Meyer*.

SGHAD’s position is that it will continue to perform under the Agreement so long as it has

1 the wherewithal to do so. The continuation of its performance does not hinge on SGHAD's  
2 requested declaratory relief. There is no allegation that the issuance of declaratory relief will have  
3 any practical consequences or that such issuance is likely to alter the parties' behavior. This  
4 matter fails all of the tests set forth by the California Supreme Court in the *Meyer* decision.

5 The *Meyer* decision, of course, does not stand alone. As set forth in *Lee v. Silveira* (2016)  
6 6 Cal.App.5th 527, 546, the actual controversy language in section 1060 "does not embrace  
7 controversies that are 'conjectural, anticipated to occur in the future, or an attempt to obtain an  
8 advisory opinion from the court.'" The *Lee* case involved an action brought by three members of  
9 the Board of a homeowners' association against six other board members, but not against the  
10 homeowners' association itself, alleging that the six engaged in improprieties in obtaining bids for  
11 and awarding a management contract. The plaintiffs did not seek the invalidation of the  
12 management contract (which would have required a suit against the association and the manager)  
13 but sought declaratory relief to govern the future conduct of the Board members and the  
14 Association's officers (such as requiring three bids for contracts involving material amounts,  
15 following "proper" bidding procedures, making verbatim transcripts of Board proceedings, etc.).  
16 The defendants brought an anti-SLAPP motion to strike the declaratory relief complaint and the  
17 trial court denied that motion. The Fourth District Court of Appeal reversed that denial and  
18 ordered dismissal of the plaintiffs' case. The Court noted that there was no evidence to show there  
19 was an actual controversy between the parties concerning the taking of verbatim notes of board  
20 meetings by the board secretary. (*Lee*, at p. 547) The Court dealt with other declaratory relief  
21 requests as follows (*Id.*, at pp. 548-549):

22 Lastly, as noted *ante*, several of the subject matters in which plaintiffs requested a  
23 judicial declaration appear to involve controversies that were "conjectural,"  
24 "anticipated to occur in the future," or would result in an "advisory opinion" from  
25 the court,<sup>16</sup> including No. 1 ["at least three bids are required before the FVHOA  
26 can award contracts in material amounts"]; No. 5 ["contractors doing business  
27 with the FVHOA ... should be free of conflicts of interests"]; No. 6 ["FVHOA  
28 should not enter into contracts based upon former employees using confidential  
information"]; No. 7 [the FVHOA board "should not disclose confidential  
information of the FVHOA" with the manager defendants]; and No. 9 [manager  
defendants and FVHOA should "not be permitted to retaliate against [FVHOA]  
members for their lawful public participation or questions of their [b]oard"]. (See  
*Pacific Legal Foundation v. California Coastal Com.* (1982) 33 Cal.3d 158, 170–  
171, 188 Cal.Rptr. 104, 655 P.2d 306 [ripeness doctrine generally prevents courts  
from issuing purely advisory opinions on matters before the controversy between

1 the parties has become sufficiently “ ‘definite and concrete’ ”]; see also  
2 *Brownfield*, 208 Cal.App.3d at p. 410, 256 Cal.Rptr. 240.)

3 In addition, it appears at least one of the nine subject matters in plaintiffs’ request  
4 for judicial declaration involved past wrongdoing of one or more members of the  
5 “majority block” that cannot be the basis of a judicial declaration: No. 8 [“the  
6 FVHOA treasurer [i.e., McDonald] should not be retaliated against by the  
7 [m]ajority [b]lock ... because he raised legitimate concerns about the FVHOA  
8 reserve deficiency, and raised ways of reducing FVHOA costs”].

9 SGHAD layers conjecture upon conjecture in this action. It assumes that its property  
10 owner members, who are living in an area threatened by the reactivation of the Santiago Landslide  
11 if ground water levels rise, will not seek and approve an assessment before the SGHAD’s funds  
12 run out. Perhaps the members would be more likely to vote for a reduced annual assessment that  
13 is more in line with the budgets of less than \$270,000 per year that the SGHAD operated under  
14 before it began incurring the legal expenses of this arbitration proceeding, as opposed to the  
15 budget of \$466,900 that SGHAD sought to fund in its 2022 proposed assessment (see Decl. of Uri  
16 Eliahu, submitted with SGHAD’s opening arbitration brief, at page 3, line 3). This conjecture is  
17 layered upon the conjecture that a future City Council will sue the SGHAD if the SGHAD fails to  
18 operate the Dewatering Facilities when the SGHAD has no funds to do so.

19 Simply put, this matter fails to meet the requirement of a case of actual controversy as set  
20 forth in California Code of Civil Procedure section 1060 and as elucidated by the California  
21 Supreme Court in the *Meyer* case.

22 V. The Doctrines of Impossibility, Impracticality, and/or Frustration of Purpose Do Not  
23 Apply in This Matter.

24 The doctrines of Impossibility, Impracticality, and/or Frustration of Purpose cannot serve  
25 as grounds to excuse performance by SGHAD because it was foreseeable that the SGHAD would  
26 run out of funds if its’ constituent members did not replenish the SGHAD’s funds through an  
27 assessment. Moreover, running out of money to perform a contract has never been an excuse to  
28 performance. It could be grounds for bankruptcy protection which may relieve a party from  
performance obligations. It may also make it impossible for the aggrieved party to compel  
performance, which only means that some breaches of contract may be without redress. But there  
is simply no authority that merely running out of funds is an absolute excuse to performance.

1           The California Supreme Court addressed the issue as far back as 1944 in *Lloyd v. Murphy*  
2 (1944) 25 Cal.2d 48. That case involved a 1940 lease where the lessee defendant would use the  
3 premises for the selling of new automobiles and sale of gasoline and nothing else without the  
4 consent of the lessor, plaintiffs. Governmental restrictions resulting from World War II placed  
5 severe restrictions on those uses and, though plaintiff waived the restrictions on the limited use,  
6 the defendant repudiated the lease, arguing impossibility and frustration of purpose. The Court  
7 explained in its decision that impossibility and frustration of purpose are similar defenses, but that  
8 in frustration of purpose situations, performance remains possible, but the expected value of  
9 performance has been destroyed by a fortuitous event. The Court summarized the lack of  
10 foreseeability requirement inherent in the defense as follows:

11           The courts have required a promisor seeking to excuse himself from performance  
12 of his obligations to prove that the risk of the frustrating event was not reasonably  
13 foreseeable and that the value of counterperformance is totally or nearly totally  
14 destroyed, for frustration is no defense if it was foreseeable or controllable by the  
15 promisor, or if counterperformance remains valuable.

16 (*Id.* at p. 54)

17           Ultimately, the Court affirmed the judgement adverse to the defendant lessee finding that  
18 “Defendant has therefore failed to prove that the possibility of war and its consequences on the  
19 production and sale of new automobiles was an unanticipated circumstance wholly outside the  
20 contemplation of the parties.” (*Id.* at p. 56.) In addition, the Court found that defendant had also  
21 failed to prove a total or near total destruction of the leased premises, which was also required  
22 under the doctrine.

23           The same principal requirements for application of frustration of purpose were applied in  
24 *Habitat Trust for Wildlife, Inc. v. City of Rancho Cucamonga* (2009) 175 Cal.App.4th 1306, 1336,  
25 where the court cited *Lloyd* in stating:

26           [W]here performance remains possible, but the reason the parties entered the  
27 agreement has been frustrated by a supervening circumstance that was not  
28 anticipated, such that the value of performance by the party standing on the  
contract is substantially destroyed, the doctrine of commercial frustration applies  
to excuse performance.

          Foreseeability is similarly a requirement of the defense of impossibility (and its derivative,  
impracticality). See *Glendale Fed. Sav. & Loan Assn. v. Marina View Heights Dev. Co.* (1977) 66

1 Cal.App.3d 101, 154 [“Since the evidence at bar is devoid of any condition or expense which  
2 could not reasonably have been anticipated, Misbin and Holmes cannot eschew their contractual  
3 obligation by relying upon the defense of impossibility.”]

4 The facts demonstrate that the SGHAD was under no misapprehension that the initial \$3.5  
5 million in funding from the settlement sums in the Delmonico Lawsuit would not last indefinitely  
6 and would have to be supplemented within decades. The City urged \$8 million to be allocated to  
7 the District, but the property owner plaintiffs, encouraged by their attorneys, would agree to only  
8 \$3.5 million. (See Decl. of Michael Rubin, ¶ 6 and see the meeting notes of the plaintiffs’  
9 Landslide Committee dated March 5, 1998, Ex. 3, ANA 535.) The overwhelming majority of the  
10 properties within the boundaries of the SGHAD are properties that had been owned by plaintiffs in  
11 the Delmonico Lawsuit. (See Decl. of Michael Rubin, ¶ 10, and Ex. 38, p. SGHAD 4772.) One  
12 of the Directors of the SGHAD that voted to approve the Agreement with the City at the  
13 SGHAD’s May 10, 1999 Board meeting was Ed Muratori. (See Ex. 13, p. SGHAD 4084.) Ed  
14 Muratori was a plaintiff property owner who was present at the March 5, 1998 Landslide  
15 Committee meeting wherein the City’s proposal to allocate \$8 million to the SGHAD was  
16 discussed and the plaintiffs’ attorneys preference for a \$3.5 million allocation was also discussed.  
17 (See Ex. 3, ANA 533 and 535.)

18 At the first meeting of the SGHAD Board, on March 29, 1999, Board member Salene  
19 asked City representative, Michael Rubin, about the cost of operating the Dewatering System. Mr.  
20 Rubin responded that the cost being paid by the City was approximately \$230,000 per year. Mr.  
21 Salene stated that \$3.5 million would not be enough to cover the costs indefinitely and Mr. Rubin  
22 concurred, indicating that the City had proposed a larger amount of the settlement sum go to the  
23 SGHAD but that had been rejected. (See Decl. of Michael Rubin, ¶ 11 and March 29, 1999  
24 SGHAD Minutes, Ex. 12, at the bottom of p. SGHAD 4088.) In addition the SGHAD would have  
25 to pay for the costs of its legal counsel that attended its Board meetings. (Stipulation of Facts  
26 #14.) At its May 10, 1999 meeting the Board discussed the bid it received for liability insurance  
27 for \$63,000 per year. (Stipulation of Facts #14.) The annual costs of the SGHAD which were  
28 known to the SGHAD before its Board approved the Agreement with the City on May 10, 1999

1 made it obvious that an assessment would be needed to supplement the \$3.5 million in less than 30  
2 years. In fact, at the May 10, 1999 SGHAD Board meeting, Chairman Collett made a motion to  
3 not approve the contract with the City based upon his belief that the SGHAD would be  
4 underfunded. This motion was seconded by Director Muratori who stated that he agreed with  
5 Collett.

6 Accordingly the doctrines of impossibility, impracticality, or frustration of purpose have  
7 no application to this matter, because it was completely foreseeable (and foreseen) that the \$3.5  
8 million would be depleted, unless an assessment was passed to supplement the SGHAD's funds.

9 VI. Declaratory Relief in This Matter is Not Appropriate and Should be Denied by the  
10 Arbitrator.

11 There is no actual controversy in this matter that is minimally required for the issuance of  
12 declaratory relief. There is no allegation that the City has threatened to sue SGHAD if SGHAD  
13 fails to continue the operation of the Dewatering Facilities after SGHAD's funds run out. In fact,  
14 it would seem to be an idle act to sue the SGHAD to perform under such circumstances, because  
15 the SGHAD would not have the capability of performing. SGHAD is unable to show how  
16 declaratory relief in this matter will assist the parties to conform their conduct to the law and  
17 prevent future litigation. There is no, and can be no, allegation that the continuation of the  
18 contractual relationship between the parties hinges on the SGHAD's requested declaratory relief.  
19 There is no allegation that the issuance of declaratory relief will have any practical consequences  
20 or that such issuance is likely to alter the parties' behavior. This matter fails all of the  
21 requirements for declaratory relief set forth by the California Supreme Court in the *Meyer*  
22 decision.

23 Moreover, SGHAD also fails in its justification for a declaration that it will be excused  
24 from further performance if it runs out of funds. It cannot meet the requirements to be excused  
25 through the doctrines of impossibility, impracticality and/or frustration of purpose because  
26 SGHAD is unable to show that depletion of the \$3.5 million GHAD Distribution was  
27 unforeseeable.

28 Awarding declaratory relief in this matter would encourage litigation to determine

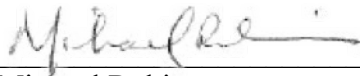

1 questions that need never otherwise become lawsuits/arbitrations. Some may ask why not open  
2 the courts to whatever hypothetical questions that trouble a party to a contract. Public policy, as  
3 incorporated in Code of Civil Procedure section 1060, has answered that question by limiting  
4 declaratory relief and excluding matters like this one, which need never manifest in litigation.

5 Respectfully submitted,

6 Dated: January 23, 2023
